## Course Description

### Faculty of Marxism

**Course Code:** 1713000050

**Course Name:** The basic principle of Marxism

**Credit/Hours:** 3/48

**Textbooks:** Introduction to the Basic Principles of Marxism. Higher Education Press, Year 2018

**Reference Books:** Marx, Engels, Lenin, Mao Zedong, Deng Xiaoping, Jiang Zemin, Hu Jintao, and Xi Jinping's classic works.

**Course Description:** The "The Basic Principles of Marxism" course is a required course for undergraduates in colleges and universities. It is a basic and core position in Marxist theory courses in colleges and universities. It has strong leadership, radiation and divergence functions. This course focuses on

teaching the most basic principles of Marxism, the most fundamental standpoint approach, the most salient features, and the most noble ideals. It helps students to systematically grasp Marxist material, practical, dialectical, epistemological, historical materialistic, and correct. Understand the development laws of capitalist society and socialist society, form a scientific world outlook, history outlook, outlook on life and values, and actively learn to use Marxist world views and methodologies to understand and analyze historical and practical issues. Establish ideals and convictions for building socialism with Chinese characteristics, and lay the ideological and theoretical foundation for cultivating students into a new generation of ideals, morals, culture, and discipline.
